

Who is Eligible to Receive Certified Copy Of An AZ Fetal Death Record (A.C.C. R-9-19-314)

Arizona is a "closed record" state. That means that vital records are not public record.

Arizona law identifies those who are eligible to receive a certified copy of an Arizona death record:

Who is Eligible to Apply in Arizona:

1. A parent of a fetus or a person who is of legal age and who is authorized by a parent of the fetus may request a certified or noncertified copy of a certificate of fetal death registration for the fetus
2. For a parent whose name is not included in the registered fetal death record, documentation demonstrating that the person submitting the request is a parent of the fetus
3. A person authorized by a parent of the fetus to receive a certified or noncertified copy of the certificate of fetal death registration for the fetus
4. Only persons 18 years of age or older may obtain a certified copy of a certificate of birth resulting in stillbirth. In addition, to protect the confidentiality rights of our citizens, Arizona law specifies that only the parents listed on the record or another

person authorized by one of the parents may obtain a certified copy of a certificate of birth resulting in stillbirth

Presenting documentation and forms of ID in languages other than English:

Note: An applicant presenting documents from a foreign country as proof of relationship or proof of eligibility must provide certified copies of the documents. Photocopies are not acceptable. The applicant must also provide a certified translation of the documents.
